800-837-3707

In partnership with **FIRST'S PAY AS YOU POUR**, help your hospitality insureds manage cash flow and mitigate exposure.

Payments are based on real data, not estimates

Insured self reports sales data from information obtained from their point of sale system or other approved method. The sales data reported will determine the amount your insured will be billed for in that biweekly period.

Eliminate big over and under payments

FIRST Pay as You Pour helps eliminate your insured owing a big payment or being owed cash they could have used during the policy term. At the end of the policy term, an audit of sales data will determine the final amount owed by the insured. Discrepancies or pre-policy audit balances can be considered for financing with the policy renewal for the next year.

Improve customer cash flow

10% down payment, 26 reporting presents over 12 months
